

SuperBooth 18: We start very, very quiet. With two small, but special impressions. While heaps of top news and other details from Berlin are already buzzing around the globe, while headlines outdo each other and seem to be getting bigger and bigger, we discover a noble retro effect device, and a full-blown drum computer ...

Brand new – yet strangely familiar: the JUNE-60 Chorus from [tc electronic](#). The ideal partner for the Jupiter-8, or for any similar classic synth “without” chorus effect.

[MFB](#)-Tanzbär 2 supprises with its 13 illuminated volume faders (12 instruments + master volume). Well, that “bear” is more than a simple drum machine – it has sample slots, analog filters and an integrated bass synthesizer ...

Two detailed reports on SuperBooth18 will follow in the near future ...
