

We have to admit that the genoQs Octopus is a step-sequencer of extremely noble design. Even if it's a little tricky to operate, its appearance is gorgeous, making this sequencer one of the most attractive performance controllers in electronic music.

*genoQs Machines* stopped operating (sadly) in 2012. Its fan-community, however, is still alive and kicking ...

So it is not surprising that a new Community Edition [OS Update](#) was released in 2017. The respective files and update instructions are available on the manufacturer's website.
