

Just a note: the opportunity to pre-order the new **GRP A10** at the introductory price ends in a week. That's when the GRP A10 will be unveiled for the first time at **SuperBooth '26**. It will be exhibited as a physical unit only (without sound), but the prototype seems nearly ready so far.

Current pre-order price of the GRP A10 is 10,000 Euros + VAT and will increase to the regular retail price of 12,000 Euros + VAT after SuperBooth '26. Orders can be placed directly with GRP - Email: [info \(at\) grpsynthesizer.it](mailto:info@grpsynthesizer.it) ...

Since there are already over 40 reservations, the GRP A10s that have been pre-ordered will be delivered late 2026 and in the first half of 2027 (especially for orders placed now).

We would also like to draw your attention to our [GRP A4 sound sheet](#) (free download, link below). It was created for a friend and might also be of interest to other GRP A4 users. The sound sheet is formatted in DIN A4 (landscape), with space for potential punch holes.
