

Solaris - 5th production run and sounds download  
[John Bowen Solaris](#) synthesizer: production round #5 is now open for reservations. This production run of 50 units will start in July, once the graphic display shipment arrives. When you make a deposit, make sure you tell John if you would like a black or white front panel. There is also the option to have blue LED wheels (clear wheels versus the standard dark wheels).

See John Bowen's [website](#) for detailed info.

Storing back-ups and organizing Solaris' soundfiles is extremely simple, since your entire Solaris contents are on a Compact Flash card.

Many people asked for the soundfiles we used in our demos. So, here they are! Our Solaris sounds are located in Bank 0. Download the zip-file and copy "Presets Bank 0" in your own Solaris CF card - that's it.

GreatSynthesizers Solaris soundfiles: **Bank 0**

- Sound 63 - 69: **String/Pad sounds** (69: is brilliant, we must say)
- Sound 70 - 79: **Wavetable sounds**
- Sound 80 - 84: **Arpeggio sounds**
- Sound 90 - 96: **Sweeps/LFO/Phaser sounds**
- Sound 100 - 102: **String sounds**

[Download GreatSynthesizer Solaris Sounds \(zip File\)](#)

PS: please save your own sounds before overwriting them!
