

The KiwiTechnics Polysix upgrade is now available. It contains:

- A complete replacement board for the troubled Korg Polysix KLM-367 circuit board.
- Memory expansion to 1024 tones (!).
- MidiCC and Sysex support of all parameters.
- Midi In & Out.
- Arpeggiator MIDI clock.
- ArpMode random (MIDI only).
- Arpeggiator Midi data output.
- etc.

See <http://kiwitechnics.com/kiwisix.htm> for more information.
