

Since THE RIVER is the product of a very small company, promotion material and other info of the instrument is rare. Here are 3 new promo videos of that iconic French Analog Synthesizer.

The demos concentrate on different topics: Internal effects (The Triko), keyboard expressiveness (aftertouch) - pads and synth soli, and last but not least controlling external (monophonic) analog synthesizers via the THE RIVER sequencer ...

---

**First video:** TRIKO Examples. TRIKO is the internal effect unit also responsible for the tremendously “warm” sound of THE RIVER ...

**Second video:** Performing THE RIVER, including play-along (and sound processing) of the Roland SH-1 synthesizer ...

**Third video:** Expressiveness of THE RIVER keyboard. Vivid pads and expressiv synth soli result from the excellent aftertouch sensitivity. The last part of the video shows another duo-synth performance with the Sequential PRO-One ...
