

Robert Wittek is one of the best keyboard players and sound programmers around today. Fascinated by any wavetable synthesizer (e.g. the Prophet-VS), he has now set his sights on the Solaris. His report is in German only (sorry about that), but we wanna point to the audio-workshop which comes with it. The 6 Solaris audio parts are recommend to all synthesists around the globe.

Test report: www.synthesizer.at/synthesizer/Solaris/solaris.htm (German only)

Direct link to the audio workshop:
