

Awesome! Tom Oberheim offers the powerful [Two Voice Pro](#) synthesizer in White or BLACK. The new black version looks superb, although the classy creamy color might be a little easier to maintain – traces of wear and dust are usually less visible on light top surfaces. However, the black Two Voice Pro looks very smart and cool ...

By the way: some original SEM synthesizers were made in BLACK around 1980. There are pictures around of black Two Voice-, Four Voice- and Eight Voice-machines. We assume that they were made on special request only ...
