

Rare instruments for sale: Moog System 55 and GRP A8

A rare opportunity for fans of large synthesizers: there's a Moog System 55 and a GRP A8 for sale in Switzerland. We caught up with some pictures and information from the seller.

Moog System 55

The Moog 55 is in average/good condition. Of course it is 40 years old and now requires a basic service (cleaning, calibration, ...). One key of the Moog controller keyboard is not working properly (it looks like a mechanical problem).

Two auxiliary modules of the lower panel have been replaced by modules from *Sound Arts* (trigger, S-trigger module as well as multiples, trunk lines). And the small blank panel of the original 55 has been replaced by another *Sound Arts* module. So there's an extra envelope now – the one with illuminated switches.

Moog System 55

The GRP A8 is one of only 22 in existence worldwide. It features red/blue LEDs and is in immaculate condition.

Find out more about the 6-VCO studio synthesizer in our [GRP A8 review](#).
