

Roger Linn Modular Control Surface

A Modular Control Surface designed by Roger Linn, to let anyone create a custom control arrangement by plugging a variety of available modules into a chassis, including buttons, sliders, pots, rotary encoders, drum pads, trackpads and more.

Roger Linn LinnDrum Surface, with the signature of Dave Smith on it

LinnDrum Surface, a drumbeat-oriented control surface for use with computer. Note the pressure- and position-sensitive touch sliders that eventually made their way into Tempest. This one was something Dave Smith and Roger Linn considered on the way to Tempest.

Find more ideas that for various reasons never made it to production on Roger Linn's website: [Shelved Product Ideas](#).
