Legowelt (Danny Wolfers) introduces the boutique synthesizer Roland D-05, a reincarnation of the classic D-50. That revolutionary instrument helped define the sound of the late '80s with its instantly recognizable mix of sampled attacks and synthesized sustaining waveforms, plus built-in chorus, reverb, and EQ. The new D-05 impresses with its minimal size, authentic sound and joystick controller. In addition, there's a 64-step polyphonic onboard sequencer, and an arpeggiator.

Roland Boutique D-05 Walkthrough with Legowelt:
