

Axel Fischer of Schmidt Synthesizers has informed us that a 3rd series of 25 units is being planned.

„Last year, we assumed that the 2nd Schmidt series would also be the last one. The electronics behind Schmidt Synthesizers is very elaborate and the prices for the components have been going up steadily for years. But since the 2nd series of 25 units (to be exact: 27 – we did order some extra components) was sold out within 14 months, those component prices are still acceptable.

Since Schmidt Synthesizers still enjoy serious support, we're happy to announce that additional units of this wonderful instrument will be available in 2018. At the moment, we're just rounding up the current series, but orders for the 3rd series can be placed as of now.

Delivery is estimated to begin in March/April 2018. The costs remain stable – at 19.900 € (incl. VAT) for the *Black* Schmidt and 20.900 € (incl. VAT) for the *White* Schmidt.“

(A. Fischer / Schmidt Synthesizers)
