

A short, but informative video (17 minutes). The following synthesizer documentation was of course created as advertising for Novation. Its journey starts in 1992 with the cute MM10 Keyboard (for Yamahas QY10 Pocket Workstation) and ends up in the present with Launchpad and Mininova. With the help of many musicians and synth designers, among them Ian Jannaway (Co-Founder of Novation) ...

... and veteran Chris Huggett. The latter is best known for his EDP Wasp and OSCar synthesizer way back in the early 80s - today he's a sterling member of the Novation team. Many features of the Bass Station, [Bass Station II](#), Peak and [Summit](#) carry Chris Huggett's signature (take, for instance, the innovative multi-functional use of synth keys, or the dual filter combinations, ...).
