

SoundForce SFC-60 demo (video)

A few months ago we announced the SFC-60 hardware controller for the [TAL-U-NO-LX](#) Juno-60 Software. As the SFC-60 is a class-compliant MIDI device, it can be used not only with the TAL U-NO-LX, but any other MIDI-mappable software instrument. And ah, yes ... the SFC-60 is not industrially manufactured but hand-made.

Unique MIDI Controllers.  
Available fully-assembled or as DIY kits.

Here's the video that shows the controller (and the software) in action. The SFC-60 controller will ship in December 2014 ...
